Re: NYSDOH Logbook #19338  
DWSRF #15072 PWS #3503550  
Basis of Design Report  
Distribution Improvements  
Beaver Dam Lake Water Corporation  
(T) New Windsor, Orange County

Dear Mr. Harrington:

The New York State Department of Health, in consultation with the Orange County Department of Health, has reviewed the above referenced basis of design report. The report was received electronically by this office on September 9, 2014, and proposes improvements to Beaver Dam Lake Water Corporation's existing distribution system. The work is to be conducted as a part of the Corporation's existing New York Drinking Water State Revolving Fund (NYDWSRF) Project (#15072). This letter represents our formal endorsement of the proposal. We offer the following comment for your consideration.

- 1) Section V.B. of the basis of design report indicates that the project cost estimates include a budget to provide for the relocation of new services utilizing project funding. As discussed, the Water Corporation would have to assume ownership/control of all project components that they wish to be funded through the DWSRF program.

Please submit one copy of plans and technical specifications for our review. Please feel free to contact this office at (518) 402-7650 or [scott.alderman@health.ny.gov](mailto:scott.alderman@health.ny.gov) with any questions. Please reference the above log number on any future correspondence pertaining to this project.

Sincerely,

N. Scott Alderman, Ph.D.
